

Thomas Telford 2007 Journals Price List

We are pleased to announce that two new parts of *Proceedings of the Institution of Civil Engineers* will be available from 2007. See below for further information.

Energy

Part of the *Proceedings of the Institution of Civil Engineers*

Energy will provide authoritative, stimulating and informative papers on all aspects of the planning, design, construction, maintenance, operation and decommissioning of projects for the generation, conservation, distribution and more efficient use of energy.

Energy covers a range of subject matters including the development of sustainable energy policy and technology, renewable energy sources, nuclear power and fossil fuels. Other areas of focus are electricity generation and transmission, district heating, storage schemes, energy conservation and improving energy efficiency in buildings, infrastructure and transport systems.

ISSN Print: 1751-4223

ISSN Online: 1751-4231

Management, Procurement and Law

Part of the *Proceedings of the Institution of Civil Engineers*

Management, Procurement and Law will publish original research and practice papers on all civil engineering and construction aspects of management, procurement and law. The range of subjects covered includes managing the planning, design, procurement, construction and operation of civil engineering and construction projects and associated issues of quality, value, risk, environment and safety.

Management, Procurement and Law publishes papers on national and international procurement procedures, conditions of contract, avoidance and resolution of disputes and all construction-related legal issues. The management of civil engineering and construction businesses is also covered, including information technology systems, knowledge management, business development, relationship management and staff recruitment, development and training.

Changes to our journal packages

In 2007, the following changes will be made to the journal discount packages:

Package A – All ICE/TT journals packages

Energy and *Management, Procurement and Law* will be added.

Package B – ICE Proceedings and archive package

Energy and *Management, Procurement and Law* will be added.

Package C – ICE Proceedings package

Energy and *Management, Procurement and Law* will be added.

Why subscribe to Thomas Telford Journals

Authority and prestige. Thomas Telford is one of the leading providers of authoritative and comprehensive information for professionals and academics in civil engineering and construction worldwide, publishing engineering journals since 1836.

The highest standards. Full peer review and assessment by international editorial panels.

Exposure. International readership of print and online editions.

Online access. A subscription to any of our journals, either individually or as part of a package, includes free online access to the last 5 years' worth of papers.

The ICE journals website provides:

- reference linking under CrossRef
- advanced search facilities
- information on related books and events
- news service
- seamless access for everyone at a customer site, no need for user name or password
- dedicated section for librarians and information scientists
- library super-user option, providing remote access and usage statistics
- e-mail alert options, detailing advanced contents lists for new journals
